Greeting & Setup

Thank you for purchasing the WLP-7F20 Panel PC. We wish that this unit will be durable and reliable in providing your needs. Please follow the instructions below to ensure the unit continues to have high performance

Unpacking

After opening the carton, there will be a unit with an accessory box. Examine the contents to see if there are damages to the unit and if all accessories are present.

Setting up

Please read this manual carefully and remember to keep this manual for future reference.

Safety Instructions & Cleaning

The unit has undergone various tests in order to comply with safety standards. Inappropriate use may be dangerous. Please remember to follow the instructions below to insure your safety during the installation and operating process.

Transporting & Placement of unit

-
1. When moving the unit on a cart; be very cautious. Quick stops, excessive forces and uneven surfaces may cause the cart to overturn thus risking the unit to fall to the ground.
 2. If the Monitor display unit does fall to the ground, immediately turn the power off and disconnect cords. Then contact a service technician for repairs. Continual use of the unit may result cause a fire or electric shock. Also, do not repair the unit on your own.
 3. Having two or more people transporting the display unit is recommended. In addition, when installing the open frame by suspending it also requires two or more people.
 4. Before suspending the unit, make sure the material used for suspension is sturdy and stable. If not properly suspended, the display unit may fall and cause serious injury to people standing nearby as well as to the unit itself.
 5. If you wish to mount the display unit, remember to use only the mounting hardware recommended by the manufacturer.

Electrical and Power Source Related

1. This Monitor display unit must operate on a power source as shown on the specification label. If you are not sure what type of power supply used in the area, consult your dealer or local power supplier.
2. The power cords must not be damaged. Applied pressure, added heat, and tugging may damage the power cord.
3. The power cord must be routed properly when setup takes place. We advise that this aspect measure is to prevent people from stepping on the cords or while the unit is suspended to prevent flying objects from getting tangled with

the unit.

4. Do not overload the AC outlets or extension cords. Electrical shocks or fires may occur from overloading.
5. Do not touch the power source during a thunderstorm.
6. If your hands are wet, do not touch the plug.
7. Use your thumb and index finger, grip firmly on the power cord to disconnect from the electrical socket. By pulling the power cord, may result in damaging it.
8. If the unit is not going to be in use for an extended period of time, remember to disconnect the unit.
9. Connect the unit to a power source with the same numerical value as spec. label shown. Please use only the power cord provided by the dealer to ensure safety and EMC compliance.

Various Factors of Environment

1. Do not insert objects into the openings.
2. Do not have liquids seep into the internal areas of the Monitor display unit.
3. Having liquids seep in or inserting objects into the unit may result in electric shocks from taking and/or short circuiting the internal parts.
4. Do not place the Monitor display unit in the presence of high moisture areas.
5. Do not install the Monitor display unit in a wet environment.
6. Do not place near unit near heat generating sources.
7. Do not place the unit in a location where it will come in contact with fumes or steam.
8. Remember to keep the Monitor display unit away from the presence of dust.

-
9. If water has flow in or seep in, immediately disconnect the open frame unit. Then contact a service technician for repairs.

Ventilation Spacing

1. Do not cover or block the openings on the top and back sides of the display unit. Inadequate ventilation may cause overheating thus reducing the lifespan of the unit.
2. Unless proper ventilation is present, do not place unit in an enclosed area; such as a built-in shelf. Keep a minimum distance of 10 cm between the display unit and wall.

Cleaning the unit

1. Remember to turn off the power source and to unplug the cord from the outlet before cleaning the unit.
2. Carefully dismount the unit or bring the unit down from suspension to clean.
3. Use only a dry soft cloth or clean room wiper when cleaning the LCD panel or touch screen surface. Use a soft cloth moistened with mild detergent to clean the display housing.
4. Remember to avoid having liquids seep into the internal components.

Servicing, Repairing, Maintenance & Safety Checks

1. If the unit is not functioning properly, observe the performance level of the display closely to determine what type of servicing is needed.
2. Do not attempt to repair the Monitor display unit on your own. Disassembling the cover exposes users' to high voltages and other dangerous conditions. Notify and request a qualified service technician for servicing the unit.

-
3. If any of the following situations occur turn the power source off and unplug the unit. Then contact a qualified service technician
 - i. A liquid was spilled on the unit or objects have fallen into the unit.
 - ii. The unit is soaked with liquids.
 - iii. The unit is dropped or damaged.
 - iv. If smoke or strange odor is flowing out of the open frame unit.
 - v. If the power cord or plug is damaged.
 - vi. When the functions of the unit are dysfunctional.
 4. When part replacement is needed. Make sure service technician uses replacement parts specified by the manufacturer, or those with the same characteristics and performance as the original parts. If unauthorized parts are used it may result in starting a fire, electrical shock and/or other dangers.

Battery Installation

Follow below instructions and notice the caution for replacing and disposing of the RTC Lithium battery CR2032 for safety consideration.

CAUTION:

There is danger of explosion, if battery is incorrectly replaced. Replace only with the same or equivalent type recommended by the manufacturer. Dispose of used batteries according to the manufacturer's instruction.

WEEE Information

For EU (European Union) member users: According to the WEEE (Waste Electrical and Electronic Equipment) Directive, do not dispose of this product as household waste or commercial waste. Waste electrical and electronic equipment should be appropriately collected and recycled as required by practices established for your country.

For information on recycling of this product, please contact your local authorities, your household waste disposal service or the shop where you purchased the product.

The specification is subject to change without notice.

How to Use This Manual

This manual is written for the system integrator, PC technician and knowledgeable PC end user. It describes how to configure your WLP-7F20 Panel PC to meet various operating requirements. The user's manual is divided into three chapters, with each chapter addressing a basic concept and operation of the server board.

Chapter 1: System Overview - presents what you have inside the box and gives you an overview of the product specifications and basic system architecture for the WLP-7F20 Panel PC.

Chapter 2: System Installation - describes how to set up the system.

Chapter 3: BIOS Setup Information - specifies the meaning of each setup parameter, how to get advanced BIOS performance and update to a new BIOS. Additionally, the POST checkpoint list will give you a guide for troubleshooting.

The contents of this manual are subject to change without prior notice. These changes will be incorporated in new editions of this manual.

System Overview

System Specification

CPU	Intel® Core-I i5-5200U 2.2 GHz dual-core processor	
Chipset	Intel® HD Graphics 5500	
Audio	Realtek ALC262 Audio Codec, 2+2 watts power amplifier	
LAN	Intel® I210-AT Gigabit Ethernet x 2	
Memory	Dual Channel, two DDR3L SO-DIMM socket support up to 8GB DDR3L-1333MHz	
I/O	EC	
Serial ATA	SATA 3, 600 MB/s transfer rate x 2	
Serial port	External	RS232/RS422/RS485 x 1(Set by BIOS, RS485 auto flow), RS232 x 1
	Internal	RS232 x 1 RS232 (Jumper 5V, 12V) x1
USB	External	USB 3.0 x 2 (Type A) USB 2.0 x 2 (Type A)
	Internal	USB 2.0(5V) pin head x 4, (Total internal usb2.0 pin head x 5: two for pin head x 2 one for USB webcam control, one for ISO_USB, one for R/PCT touch, Reserved USB x 2: two for miniPCIe)
WDT	Generates system reset; 256 segments, 0, 1, 2...255 sec/min.	

BIOS f

Brand: AMI
Flash ROM size: 64Mb

WLP-7F20-21 Outline Drawing (Panel Mount)

I/O connectors

Note: Share the same place with DVI output, DVI and VGA not simultaneously

VESA mount installation

Please use the supplied 4 x M4-L10 screws for VESA mounting. And as below VESA mounting holder is just a diagrammatic drawing. You can choose any standard VESA 75x75 mm mounting holder to mount our machine.

For use only with UL listed Wall Mount Bracket with minimum weight/load bearing capacity 10 Kg

Panel mount installation

1. The Panel PC can be panel mounted and comes with brackets and screws for this purpose. The required cutout for panel mounting and maximum panel thickness is shown below.

	A	B	C
WLP-7F20-15	365	298	10
WLP-7F20-17	398	325	14
WLP-7F20-19	460	360	14

Unit: mm

STEP 1

Panel Mount

Put Panel PC on the fixture (Wall, Panel.....) from the front, with the sides of the front bezel shown on the outside.

STEP2

Use provided mounting kits to fix the Panel PC and the customer's fixture

Unpacking

After unpacking the shipping carton, you should find these standard items:

- The WLP-7F20 Panel PC series
- Accessory box including the followings:
 - AC-DC adapter x 1
 - AC power cord x 1
 - BKT;WALL MOUNT STD,SUS304, 1.2MM x 8

- SCREW BONNET; M4*6.5MM,MP-4(B) x 8
- SCR; STEEL,M4*L=45MM FH MS x 8
- DVD-ROM for drivers, utility, user manual(in PDF format)

Inspect all the items. If any item is damaged or missing, notify your dealer immediately.

Getting Started

This chapter tells you how to set up the system.

Setting up the System

The following is a summary of the steps in setting up the system for use.

CAUTION: Make sure that power to the system and each of the devices to be connected is switched OFF before plugging in the connectors.

1. Make any required external connections such as the keyboard, and mouse.
2. Plug the appropriate end of the power cord into the power connector of the system. Then plug the other end of the power cord to an electrical outlet.
3. Press the power switch of the system to turn on the system's power.
4. If necessary, run the BIOS SETUP program to configure the system (see Chapter 3).
5. Install the software drivers if necessary.

Installing System Software

Recent releases of operating systems from major vendors include setup programs, which load automatically and guide you through hard disk preparation and operating system installation. The guidelines below will help you determine the steps necessary to install your operating system on the Panel PC hard drive.

NOTE: Some distributors and system integrators may have already pre-installed system software prior to shipment of your Panel PC.

Installing software requires an installed HDD. Software can be loaded in the WLP-7F20 Panel PC using any of below methods:

Method 1: Use the Ethernet

You can use the Ethernet port to download software from the net to the HDD that has been pre-installed in WLP-7F20 Panel PC

Method 2: Use the COM Port

By connecting another PC to the WLP-7F20 Panel PC with an appropriate cable, you can use transmission software to transmit Operation System Software to the HDD that has been pre-installed in the WLP-7F20 Panel PC.

Method 3: Use a External CD-ROM

In order to boot up system from USB-CD/DVD drive, please connect USB-CD/DVD drive, turn on computer power, keep on pressing "F11" key, go into BIOS quick boot menu, select "USB-CD ROM", WAIT FOR 20 SECONDS, then press enter, system OS will boot up from USB-CD/DVD drive directly

Then you can use the external CD-ROM to transmit the software to the HDD that has been pre-installed in the WLP-7F20 Panel PC

Installing the Drivers

After installing your system software, you will be able to set up the LAN, VGA, Audio and USB functions. All drivers are stored in a CD

disc, which can be found in your accessory pack.

The various drivers and utilities in the disc have their own text files that help users install the drivers and understand their functions.

Follow the sequence below to install the drivers:

- Step 1 – Install Intel® INF Driver
- Step 2 – Install Intel® VGA Driver
- Step 3 – Install Intel® LAN Driver
- Step 4 – Install Audio Driver
- Step 5 – Install Touch Driver

Step 1 – Install Intel® INF Driver

1. Open file of **chipset**
2. Click on the **setup.exe**
3. Follow the instructions that the window shows
4. The system will help you install the driver automatically
5. Reboot system

Step 2 –Install Intel® VGA Driver

1. Open file of **VGA**
2. Select the OS folder your system is
3. Click on the **.exe** file located in the OS folder
4. Follow the instructions that the window shows
5. The system will help you install the driver automatically
6. Reboot system

Step 3 – Install Intel® LAN Driver

1. Open file of **LAN**
2. Click on the **setup.exe**
3. Follow the instructions that the window shows
4. The system will help you install the driver automatically

5. Reboot system

Step 4 – Install Audio Driver

1. Open file of **LAN**
2. Click on the **setup.exe**
3. Follow the instructions that the window shows
4. The system will help you install the driver automatically
5. Reboot system

Step 5 – Install Touch Driver

1. Open file of **touch**
2. Click on the **setup.exe**
3. Follow the instructions that the window shows
4. The system will help you install the driver automatically
5. Reboot system

Note:

eGalax Touch driver supports both resistive and capacitive touch screens, user can find 2 touch icons shown in utility, please set up touch screen by selecting the correlative one.

(USB controller: resistive touch screen, COM4 controller: capacitive touch screen)

BIOS Setup

BIOS Introduction

The AMI BIOS (Basic Input / Output System) installed in your computer system's ROM supports Intel processors. The BIOS provides critical low-level support for a standard device such as disk drives, serial ports and parallel ports. It also adds virus and password protection as well as special support for detailed fine-tuning of the chipset controlling the entire system.

BIOS Setup

The AMI BIOS provides a Setup utility program for specifying the system configurations and settings. The BIOS ROM of the system stores the Setup utility. When you turn on the computer, the AMI BIOS is immediately activated. Pressing the key immediately allows you to enter the Setup utility. If you are a little bit late pressing the key, POST (Power On Self Test) will continue with its test routines, thus preventing you from invoking the Setup. If you still wish to enter Setup, restart the system by pressing the "Reset" button or simultaneously pressing the <Ctrl>, <Alt> and <Delete> keys. You can also restart by turning the system Off and back On again. The following message will appear on the screen:

Press to Enter Setup

In general, you press the arrow keys to highlight items, <Enter> to select, the <PgUp> and <PgDn> keys to change entries, <F1> for help and <Esc> to quit.

When you enter the Setup utility, the Main Menu screen will appear on the screen. The Main Menu allows you to select from various setup functions and exit choices.

Main

This section provides information on the BIOS information, and Battery information

System Date

Set the system date. Use the <Tab> key to switch between data elements.

System Time

Set the system time. Use the <Tab> key to switch between time elements.

Boot

Setup Prompt Timeout

Number of seconds to wait for setup activation key. 65535(0xFFFF) means indefinite waiting.

Bootup Numlock State

Selects the keyboard NumLock state.

PXE Boot

PXE Network Boot Enable / Disable.

OS Selection

OS Selection.

Quiet Boot

Enable or disables Quiet Boot option.

Boot Option #1

Sets the system boot order.

Boot Option #2

Sets the system boot order.

Save & Exit

Save Changes and Exit

Exit system setup after saving the changes.

Discard Changes and Exit

Exit system setup without saving any changes.

Save Changes and Reset

Reset the system after saving the changes.

Discard Changes and Reset

Reset system setup without saving the changes.

Save Changes

Save the changes done so far to any of setup options.

Discard Changes

Discard the changes done so far to any of setup options.

Restore Defaults

Restore/load default values for all the setup options.

Save as User Defaults

Save the changes done so far as User Defaults.

Restore User Defaults

Restore the User Defaults to all the setup options.

Boot Override

To *override* the *boot* device.

Launch EFI Shell From filesystem device

Attempts to Launch EFI Shell application (Shell.efi) from one of the available filesystem devices.

Reset System with ME disable ModeMEUD000

ME will runs into the temporary disable mode, Ignore if ME Ignition FWMEUD001.

Appendix

A. Jumper settings and Connectors

This appendix gives the definitions and shows the positions of jumpers, headers and connectors. All of the configuration jumpers on WLP-7F20 series are in the proper position.

Note: Some of jumpers or connectors will be removed base on system configuration.

Jumper and Connector Definition Block

● JP1 – Touch Panel Type Selection

Description	Jumper Setting
3M type	1-2, 3-4 (default)
ELO type	5-6,7-8

● JP2 – LVDS Power Selection

Description	Jumper Setting
+3.3VS(for 10"/12"/15")	5-6, 7-8
+5VS(for 17"/19")	1-2, 3-4 (default)

● JP3 – Backlight Type Selection

Description	Jumper Setting
Analog Inverter	1-2
PWM Inverter	2-3

● JP5 – Sensor Selection

Description	Jumper Setting
No Panel Sensor	1-2(default)
MB Sensor 25C	3-4(default)
MB auto sensor	5-6

● JP6 –Panel Resolution Selection

Jump on =0, Jump off =1

JP15 jumper setting				Panel Resolution	Color Depth
1-2	3-4	5-6	7-8		
0	0	0	0	800x600	6bit
0	0	0	1	1024x768	6bit
0	0	1	0	1024x768	8bit
0	0	1	1	1280x768	6bit
0	1	0	0	1280x800	6bit
0	1	0	1	1280x960	6bit
0	1	1	0	1280x1024	8bit
0	1	1	1	1366x768	6bit
1	0	0	0	1366x768	8bit
1	0	0	1	1440x900	8bit
1	0	1	0	1440x1050	8bit
1	0	1	1	1600x900	8bit
1	1	0	0	1680x1050	8bit
1	1	0	1	1600x1200	8bit
1	1	1	0	1920x1080	8bit
1	1	1	1	1920x1200	8bit

● JP7 –mSATA / mini-PCIE Selection

Description	Jumper Setting
<i>Mini-PCle</i>	<i>1-2 (default)</i>
mSATA	2-3

● JP8 – CMOS Clear

Description	Jumper Setting
<i>Normal Open</i>	<i>1-2 (default)</i>
CMOS Clear	2-3

● JP9 – SATA / SATADOM Selection

Description	Jumper Setting
<i>SATA</i>	<i>2-3(default)</i>
SATA DOM	1-2

● JP10 – COM4 Power Selection

Description	Jumper Setting
<i>+5VS</i>	<i>2-3(default)</i>
+12VS	1-2

● JP11 – Heater Test Selection

Description	Jumper Setting
<i>Normal</i>	<i>Open (default)</i>
Heater Test	1-2

● JP12 – PCT/RES Touch Selection

Description	Jumper Setting
<i>PCT Touch</i>	<i>1-2(default)</i>
RES Touch	2-3

● JP13 – Backlight Control Level Selection

Description	Jumper Setting
+3V	2-3
+3.3V	1-2
+5V	OPEN (default)

1.1 Connector Definition

● PJ1 /PJ2 – HDD Power Connector

Pin #	Signal Description
